

Kids Dig Dinos

Vol. 9, October 2011

Welcome to the **Kids Dig Dinos Newsletter!** Thanks for signing up at www.kidsdigdinos.com.

Happy Halloween (soon)!

I'm Sam, creator of **Kids Dig Dinos**. I hope you like this newsletter! If you do, please email it to your friends and have

them [sign up](#) to get their own copy next month!

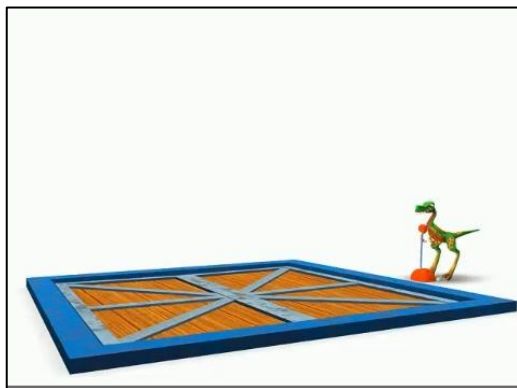

Here's my "Haunt-asaurus" ----->
(Don't be scared; I made him up!)

DINO QUESTION:

What made the dinosaurs extinct?

Dinosaurs lived and evolved for over 185 million years until they became extinct. No one knows for sure why dinosaurs became extinct, but some scientists believe that an asteroid over 9 miles wide hit the earth in the Gulf of Mexico. Do you believe dinosaurs are still alive? Don't believe me? Birds!

Scientists believe birds are evolved from former dinosaurs!

←DINO VIDEO: Check out the YouTube Video!

Click on the YouTube image and you'll be taken to YouTube where you can see this little dinosaur try to trap a T-Rex. But ... guess what happens? (I watched it over and over and laughed every time!)

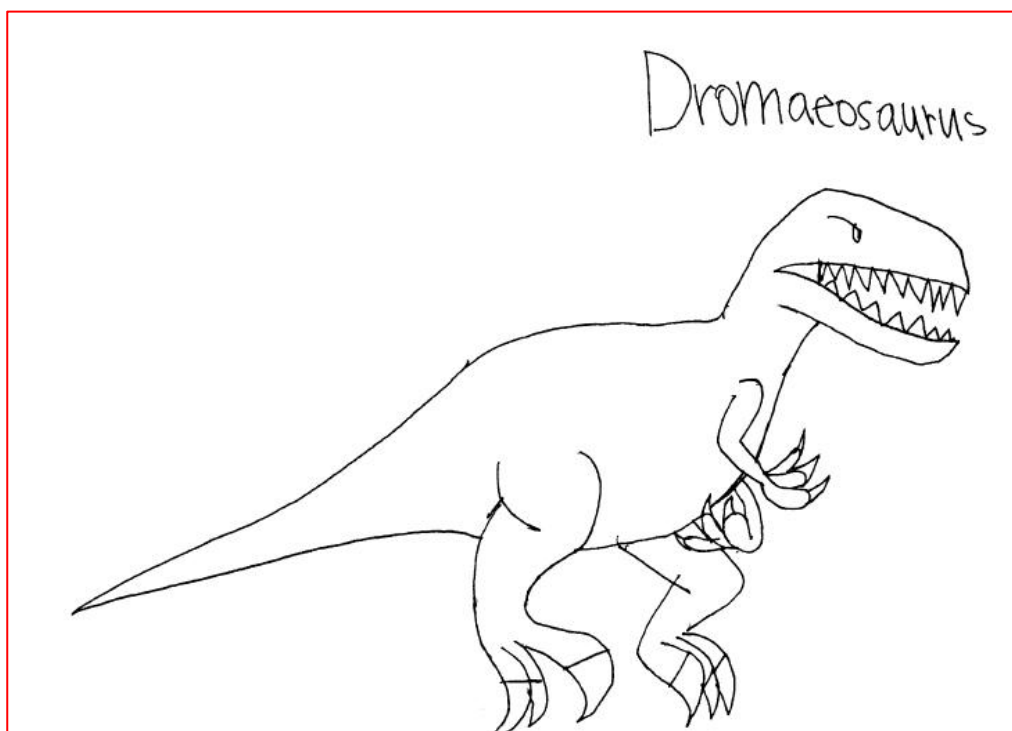

DINO MAIL BAG:

The grandfather of a **Kids Dig Dinos** fan made postage stamps for his grandson from one of my T-rex drawings. **2cool!** →

DINO ACTIVITY: Color a Dromaeosaurus! ([full size copy here](#))

Color your own Dromaeosaurus (DRO-mee-o-SAWR-us). Remember: no one knows what color dinosaurs really were, so you can make your dinosaur any **color** !

Dromaeosaurus, a fast-moving meat eater, lived about 75 million years ago and was 6 feet long and about 1 ½ feet tall.
